The purpose of this book is to give a detailed history and natural history of all the species and subspecies of indigenous birds which have occurred within the present (1973) State of Texas from the date of the first recorded bird observation in late summer of 1535 through the winter season of 1972-73. The work is organized such that the species is considered the basit unit. The species accounts include description, measurements, range map and description of the subspecies.
